National Insurance Producers Registry’s (NIPR) Mobile App for Insurance Professionals

Want to access your licensing information using your phone? Well, this ability has been available now for just over a year.

The National Insurance Producer Registry (NIPR) released its mobile app in June 2018. This app is available to Apple or Google Play users. The NIPR mobile app lets insurance professionals licensed by a state department of insurance view their demographic, licensing, and appointment information. Mobile users are also able to subscribe to renewal notification reminders.
