

FEDERAL ACTUARIAL MEMORANDUM

1. General Information

- Company Identifying Information

Company Legal Name:	Anthem Health Plans of Kentucky, Inc.
State:	Kentucky
HIOS Issuer ID:	36239
NAIC Company Code:	95120
Market:	Individual
Effective Date:	January 1, 2023

- Company Contact Information

Primary Contact Name:	Brian Strong
Primary Contact Telephone Number:	[REDACTED]
Primary Contact Email Address:	[REDACTED]

2. Scope and Purpose of the Filing

This is a rate filing for the Individual market ACA-compliant plans offered by Anthem Health Plans of Kentucky, Inc. , also referred to as Anthem. The policy forms associated with these plans are listed below. The proposed rates in this filing will be effective for the 2023 plan year beginning January 1, 2023, and apply to plans both On-Exchange and Off-Exchange.

The rates and rating assumptions proposed in this submission reflect an estimate of the claims cost impact of COVID-19, economic impacts, and expected membership migration across markets. Rates are in accordance with the regulatory framework and insurer participation in the market as of July 15, 2022, which includes increased costs based on the assumption that the enhanced ACA premium tax credits available under The American Rescue Plan Act will expire as of December 31, 2022. To the extent emerging data or changes to practice patterns or requirements show that COVID-19 vaccinations, testing and treatment are impacting costs significantly differently than assumed in this filing, or if there are changes in regulation or insurer participation, then proposed rates may no longer be appropriate and should be reevaluated for revision and resubmission. This rate filing is not intended to be used for other purposes.

Policy Form Number(s):

KY_OFFHIX_HM_01-23
KY_ONHIX_HM_01-23

3. Proposed Rate Increase(s)

The proposed rates have been developed from 2021 ACA experience.

The proposed annual rate change by product in this filing is 5.31%, with rate changes by plan from (7.20%) to 11.64%. These ranges are based on the renewing plans, and are consistent with what is reported in the Unified Rate Review Template. Exhibit A shows the rate change for each plan.

Factors that affect the rate changes for all plans include:

- Emerging experience different than projected.
- Trend: This includes the impact of inflation, provider contracting changes, and changes in utilization of services.
- Morbidity: There are anticipated changes in the market-wide morbidity of the covered population in the projection period.
- Changes in anticipated risk adjustment transfer dollars in the projection period.
- Benefit modifications, including changes made to comply with updated AV requirements.
- Changes in fees and some non-benefit expenses.

Although rates are based on the same claims experience, the rate changes vary by plan due to the following factors:

- Changes in benefit design that vary by plan.
- Updates in benefit relativity factors among plans.
- Updated adjustment factors for catastrophic plans.
- Changes in the claim cost relativity by area and network.

In addition to the rate changes by plan described above, we are also making the following other changes from rates previously filed:

- We are adding new benefit plans as shown in Exhibit A.
- Area factors have been revised based on emerging experience as shown in Exhibit M.
- Tobacco factors have been revised based on emerging experience as shown in Exhibit L.

4. Experience and Current Period Premium, Claims, and Enrollment

The experience period premium and claims reported in Worksheet 1, Section I of the Unified Rate Review Template (URRT) are for the non-grandfathered, single risk pool compliant policies of the identified legal entity in the Individual market.

- Paid Through Date

The experience reported in Worksheet 1, Section I of the URRT reflects the incurred claims from January 1, 2021 through December 31, 2021 based on claims paid through March 31, 2022.

- Current Date

The Current Date for Current Enrollment and Current Premium PMPM in Worksheet 2, Section II of the URRT is March 31, 2022.

- Experience Period Premium

[REDACTED]

[REDACTED]

The earned premium is \$308,262,918 for the legal entity as reported in cell E18 of Worksheet 1, Section I of the URRT.

- Allowed and Incurred Claims Incurred During the Experience Period

The allowed claims are determined by subtracting non-covered benefits, provider discounts, and coordination of benefits amounts from the billed amount.

Allowed and incurred claims are completed using the chain ladder method, an industry standard, by using historic paid vs. incurred claims patterns. The method calculates historic completion percentages, representing the percent of cumulative claims paid of the ultimate incurred amounts for each lag month. Claim backlog files are reviewed on a monthly basis and are accounted for in the historical completion factor estimates.

Allowed and incurred claims reported in Worksheet 1, Section I of the URRT are \$268,077,802 and \$205,789,622, respectively. These amounts differ from those shown in Exhibit B due to the URRT including Rx Rebates and transitional plan experience.

5. Benefit Categories

The methodology used to determine benefit categories in Worksheet 1, Section II of the URRT is as follows:

- Inpatient Hospital: Includes non-capitated facility services for medical, surgical, maternity, mental health and substance abuse, skilled nursing, and other services provided in an inpatient facility setting and billed by the facility.
- Outpatient Hospital: Includes non-capitated facility services for surgery, emergency room, lab, radiology, therapy, observation and other services provided in an outpatient facility setting and billed by the facility.
- Professional: Includes non-capitated primary care, specialist, therapy, the professional component of laboratory and radiology, and other professional services, other than hospital-based professionals whose payments are included in facility fees.
- Other Medical: Includes non-capitated ambulance, home health care, DME, prosthetics, supplies, vision exams, and dental services.
- Capitation: Includes all services provided under one or more capitated arrangements.
- Prescription Drug: Includes drugs dispensed by a pharmacy and rebates received from drug manufacturers.

6. Projection Factors

The experience period claims in Worksheet 1, Section I of the URRT are projected to the projection period using the factors described below. Exhibit C provides a summary of the factors.

- Trend Factors (cost/utilization)

- Morbidity Adjustment

Adjustments are made to account for the differences between the average morbidity of the experience period population and that of the anticipated population in the projection period.

The projected population consists of expected retention of existing policies and new sales. The sources of new entrants include the previously uninsured population, grandfathered and transitional policies voluntarily migrating to ACA-compliant plans, and previously insured populations from other markets or carriers. The morbidity adjustment reflects projected Anthem and market changes in morbidity, including changes driven by economic conditions and from the expiration of the enhanced ACA premium tax credits available under The American Rescue Plan Act (ARP) as of December 31, 2022. Membership projections reflect contraction similar to pre-ARP population in 2021. Exhibit E shows the morbidity factor.

- Changes in Demographics (Normalization)

The experience period claims are normalized to reflect anticipated changes in age/gender, area, network, and benefit plan in the projection period. Exhibit D provides detail of each normalization factor below:

- Age/Gender: The assumed claims cost is applied by age and gender to the experience period membership distribution and the projection period membership distribution.
- Area/Network: The area claims factors are developed based on an analysis of allowed claims by network, mapped to the prescribed rating areas using the subscriber's 5-digit zip code, and includes projected changes in provider discounts by region and network.
- Benefit Plan: The experience period claims are normalized to reflect the average benefit level in the projection period using benefit relativities. The benefit relativities include the value of cost shares and anticipated changes in utilization due to the difference in average cost share requirements.

- Plan Design Changes

Changes in benefits include the following items. Exhibit E shows each adjustment factor.

- Essential Health Benefit (EHB) Changes: Adjustments are made to reflect increased costs due to the the implementation of a \$30 copay for insulin effective 1/1/2022 as well as expected increases to Telehealth services resulting from HB188.

- Rx Adjustments: Adjustments are made to reflect differences in the Rx formulary between the experience period and the projection period.

- Other Adjustments

Other adjustments to the experience claims data include the following items. Exhibit E and Exhibit F show the factors used for each adjustment.

- Incremental COVID Impact: This reflects the net impact of changes in costs related to COVID-19, including the cost of testing, treatment and vaccinations, as well as expected changes in utilization driven by COVID-19 and other changes in practice patterns, from the experience period to the rating period.
- Induced Demand Due to Cost Share Reductions: Individuals who fall below 250% of the Federal Poverty Level and enroll in On-Exchange silver plans will be eligible for cost share reductions. The percentage of enrollment in CSR Plans in the experience period is compared to that of the projection period to adjust for the different induced demand level due to CSR between the two periods.
- Grace Period: The claims experience has been adjusted to account for incidences of enrollees not paying premiums due during the first month of the 90-day grace period when the QHP is liable for paying claims.
- Rx Rebates: The projected claims cost is adjusted to reflect anticipated Rx rebates. These projections take into account the most up-to-date information regarding anticipated rebate contracts, drug prices, anticipated price inflation, and upcoming patent expirations.
- Projected costs of pediatric dental and vision benefits are included.

Transitional product experience has been included in Worksheet 1, Section I of the URRT, in compliance with URR Instructions. In Exhibit C, transitional policies are not included in the starting claims PMPM as they are not expected to be enrolled in fully ACA-compliant plans during the projection period.

7. Manual Rate Adjustments

The experience period claims are 100% credible based on the credibility method used. Therefore, a manual rate was not used in the rate development.

8. Credibility of Experience

- Credibility Method Used

Based on an analysis of historical data, the standard for fully credible experience is 12,768 members.

To determine credibility, the following formula was used: $\sqrt{\text{experience period members} / 12,768}$

- Resulting Credibility Level Assigned to Base Period Experience

With 30,275 members, the credibility level assigned to the experience period claims is 100%.

9. Establishing the Index Rate

- Experience Period Index Rate

The experience period Index Rate is equal to the allowed claims PMPM for the essential health benefits of Anthem's non-grandfathered business in the Individual market. The experience period Index Rate is \$526.28. Due to rounding restrictions in the URRT, the experience period Index Rate displayed in Worksheet 1, Section II of the URRT may be slightly different from this number. A comparison to the benchmark was performed, and only essential health benefits were covered during the experience period.

- Projection Period Index Rate

The projection period Index Rate is equal to projected allowed claims PMPM for the essential health benefits of Anthem's non-grandfathered business in the Individual market. It reflects the anticipated claim level of the projection period including impact from trend, benefit and demographics as described in Section 6 of this memo.

The projected Index Rate is reported in Worksheet 1, Section II, cell F42 of the URRT and is also shown in Exhibit C. Note there are minor variances between the projection period Index Rate in the URRT and Actuarial Memorandum due to rounding methodology in the URRT. No benefits in excess of the essential health benefits have been included in this amount.

10. Development of the Market-wide Adjusted Index Rate

The Market-wide Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules. The three market-wide adjustments - Risk Adjustment, Reinsurance, and Exchange User Fee adjustment - are described below. In compliance with URR Instructions, these adjustments were applied on an allowed basis in the development of the Market-wide Adjusted Index Rate. Exhibit C illustrates the development of the Market-wide Adjusted Index Rate. Note that there are minor variances between the Market-wide Adjusted Index Rate in the URRT and Actuarial Memorandum due to rounding methodology in the URRT.

- Projected Risk Adjustments PMPM

Projection period risk adjustments are estimated based on the HHS payment transfer formula.

An independent consultant's study and CMS preliminary 2021 risk adjustment transfers are used to develop the assumptions for the company's relative risk to the market. Projected changes in population movements and demographics that may affect risk adjustments are also considered, as well as the impact of high-cost risk pooling.

The projected risk adjustment PMPMs reported in Worksheet 2 of the URRT are on a paid claim basis, while the projected amount applied to the development of Market-wide Adjusted Index Rate is on an allowed claim basis. Exhibit C and Exhibit G provide details.

- Projected ACA Reinsurance Recoveries Net of Reinsurance Premium

Beginning in 2017, the Federal reinsurance program is no longer in effect. The projected reinsurance amount is \$0.

- Exchange User Fees

Exchange User Fee: The Exchange User Fee is set to zero since Exchange User Fees are not required by Kynect.

11. Plan Adjusted Index Rate

The Plan Adjusted Index Rate is calculated as the Market-wide Adjusted Index Rate adjusted for all allowable plan level modifiers defined in the market rating rules. Exhibit J shows the development. The plan level modifiers are described below:

- AV and Cost Sharing Adjustments: This is a multiplicative factor that adjusts for the projected paid/allowed ratio of each plan, based on the AV metal value with an adjustment for utilization differences due to differences in cost sharing.
- Provider Network Adjustments: This is a multiplicative factor that adjusts for differences in projected claims cost due to different network discounts.
- Adjustments for Benefits in Addition to the Essential Health Benefits: A factor of 1.00 indicates that the plan does not provide benefits beyond the essential health benefits.
- Catastrophic Plan Adjustment: This adjustment reflects the projected costs of the population eligible for catastrophic plans. The catastrophic adjustment factor is applied to catastrophic plans only; all other plans have an adjustment factor of 1.0.
- Adjustments for Distribution and Administrative Cost: This is an additive adjustment that includes all the selling expense, administration and retention Items shown in Exhibit H.

12. Calibration

The Plan Adjusted Index Rate is calibrated by the Age and Geographic factors so that the schedule of premium rates for each plan can be further developed. Exhibit K shows both calibration factors.

- Age Curve Calibration

The age factors are based on the Default Federal Standard Age Curve. The age calibration adjustment is calculated as the member weighted average of the age factors, using the projected membership distribution by age, with an adjustment for the maximum of 3 child dependents under age 21. Under this methodology, the approximate average age rounded to the nearest whole number for the risk pool is 50.

- Geographic Factor Calibration

The geographic factors are developed from historical claims experience. The geographic calibration adjustment is calculated as the member weighted average of the geographic factors, using the projected membership distribution by area.

13. Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is calculated by calibrating the Plan Adjusted Index Rate by the Age and Geographic calibration factors described above, and applying consumer specific age and geographic rating factors. Exhibit N has the sample rate calculations.

14. Projected Loss Ratio

- Projected Federal MLR

Exhibit I shows the projected Federal MLR for the products in this filing. The calculation is an estimate and is not meant to be a true measure for Federal or State MLR rebate purposes. The products in this filing represent only a subset of Anthem's Individual business. The MLR for Anthem's entire book of Individual business will be compared to the minimum Federal benchmark for purposes of determining regulation-related premium refunds. Also note that the projected Federal MLR presented here does not capture all adjustments, including but not limited to: three-year averaging, credibility, dual option, and deductible. Anthem's projected MLR for the rating period of this rate filing is expected to meet or exceed the minimum MLR standards at the market level after including all adjustments.

15. Actuarial Value Metal Values

The Actuarial Value (AV) Metal Values reported in Worksheet 2, Section I of the URRT are based on the most recent approved AV Calculator. To the extent a component of the benefit design was not accommodated by an available input within the AV Calculator, the benefit characteristic was adjusted to be actuarially equivalent to an available input within the AV Calculator for purposes of utilizing the AV Calculator as the basis for the AV Metal Values. When applicable, benefits for plans that are not compatible with the parameters of the AV Calculator have been separately identified and documented in the Unique Plan Design Supporting Documentation and Justification that supports the Plan & Benefits Template. The most recent approved AV de minimis ranges as of July 15, 2022 were used for all plans.

16. Membership Projections

Membership projections are reported in Worksheet 2, Section IV of the URRT. They are based on historical and current enrollment, expected new sales and lapses, and anticipated voluntary movement from grandfathered and transitional policies as well as additional membership expected from Medicaid redetermination impacts.

For Silver level plans in the Individual market, the portion of projected membership that will be eligible for cost-sharing reduction subsidies at each subsidy level are estimated from current enrollment data as well as an assumption of the portion of members coming from Medicaid redetermination that will be eligible for cost-sharing reduction subsidies. Exhibit O provides projected distributions for each plan.

17. Terminated Plans and Products

Exhibit P provides a listing of products from 2021 and 2022 that will be terminated prior to January 1, 2023.

18. Plan Type

The plan type for each plan reported in Worksheet 2, Section I of the URRT is consistent with the option chosen from the drop-down box.

19. Reliance

In support of this rate development, various data and analyses were provided by other members of Anthem's actuarial staff, including data and analysis related to cost of care, valuation, and pricing. I have reviewed the data and analyses for reasonableness and consistency. I have also relied on Wayne Rosen, FSA, MAAA to provide the actuarial certification for the Unique Plan Design Supporting Documentation and Justification for plans included in this filing.

20. Actuarial Certification

I, Brian Strong, am an actuary for Anthem. I am a member of the American Academy of Actuaries and a Fellow of the Society of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein. I hereby certify that the following statements are true to the best of my knowledge with regards to this filing:

(1) The projected Index Rate is:

- In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
- Developed in compliance with the applicable Actuarial Standards of Practice
- Reasonable in relation to the benefits provided and the population anticipated to be covered
- Not excessive nor deficient

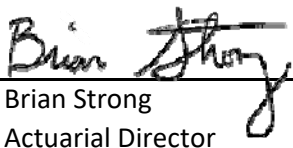

(2) The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.

(3) The geographic rating factors reflect differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

(4) The most recent AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. To the extent a component of the benefit design was not accommodated by an available input within the AV Calculator, the benefit characteristic was adjusted to be actuarially equivalent to an available input within the AV Calculator for purposes of utilizing the AV Calculator as the basis for AV Metal Values. Benefits for plans that are not compatible with the parameters of the AV Calculator have been separately identified and documented in the Unique Plan Design Supporting Documentation and Justification that supports the Plan & Benefits Template.

The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop the rates. Rather it represents information required by Federal regulation to be provided in support of the review of rate changes, for certification of Qualified Health Plans for Federally-Facilitated Exchanges, and for certification that the Index Rate is developed in accordance with Federal regulation, used consistently, and only adjusted by the allowable modifiers. However, this Actuarial Memorandum does accurately describe the process used by the issuer to develop the rates.

The rates and rating assumptions proposed in this submission reflect an estimate of the claims cost impact of COVID-19, economic impacts, and expected membership migration across markets. Rates are in accordance with the regulatory framework and insurer participation in the market as of July 15, 2022, which includes increased costs based on the assumption that the enhanced ACA premium tax credits available under The American Rescue Plan Act will expire as of December 31, 2022. To the extent emerging data or changes to practice patterns or requirements show that COVID-19 vaccinations, testing and treatment are impacting costs significantly differently than assumed in this filing, or if there are changes in regulation or insurer participation, then proposed rates may no longer be appropriate and should be reevaluated for revision and resubmission. This rate filing is not intended to be used for other purposes.

Brian Strong
Actuarial Director

NOTES:

{1} Plan level increases in rates do not include demographic changes in the population.

{2} Plan level rate increases were developed in accordance to URR Instructions. For New 2023 plans, non-zero rate increases were calculated based off 2022 terminated plans mapped to them.

22) Marketplace User Fee		Exhibit H
23) = Market-wide Adjusted Index Rate ^{3}	\$667.12	= (18)+[(19)+(20)+(21)+(22)] ÷ (17)

NOTE:

{1} Factors above are detailed in subsequent exhibits

{2} Index Rate is Projected Allowed Claims for EHBs only

{3} The Market-wide Adjusted Index Rate is the same for all plans in the single risk pool

Exhibit D - Normalization Factors

Anthem Health Plans of Kentucky, Inc.
Individual

Rates Effective January 1, 2023

	Average Claim Factors - Experience Rate		Normalization Factor ⁽¹⁾
	Experience Period Population	Future Population	
Age/Gender			
Area/Network			
Benefit Plan			
Total			

Note

{1} Normalization Factor = Future Population Factor / Experience Period Population Factor

Exhibit E - Projection Period Adjustments

Anthem Health Plans of Kentucky, Inc. Individual

Rates Effective January 1, 2023

Impact of Changes Between Experience Period and Projection Period:		
	Experience Rate	
<u>Plan Design Changes</u>		
EHB Changes		
Rx adjustments		
Total Benefit Changes		
<u>Morbidity Changes</u>		
Total Morbidity Changes		
<u>Trend & Other Cost of Care Impacts</u>		
Annual Medical/Rx Trend Rate		
# Months of Projection		
Trend Factor		
Incremental COVID Impact		
Induced Demand for CSR		
Grace Period		
Total other Cost of Care Impacts		

Note

{1} Explanation of the factors above is provided in the Actuarial Memorandum

Exhibit F - Other Claim Adjustments

Anthem Health Plans of Kentucky, Inc. Individual

Rates Effective January 1, 2023

<i>Other Claim Adjustments</i>	
	<u>PMPM</u>
Rx Rebates	
CSR Receivable	
Additional EHBs	
Pediatric Dental	
Pediatric Vision	
Total - Additional EHBs	
Additional non-EHBs	
None	
Total - Additional Non-EHBs	

NOTES:

{1} This exhibit includes projected claims from lines 13, 14, and 15 of Exhibit C and additional non EHBs.

Exhibit G - Risk Adjustment and Reinsurance - Contributions and Payments

Anthem Health Plans of Kentucky, Inc.
Individual

Rates Effective January 1, 2023

<u>Risk Adjustment:</u>		
PMPM		Net Transfer{1}
Federal Program		
<u>Reinsurance:</u> ⁽²⁾		
PMPM	Contributions Made	Expected Receipts
Federal Program	\$0.00	\$0.00
Grand Total of All Risk Mitigation Programs		

NOTES:

{1} Projected risk adjustment transfer amount is explained in the Memorandum "Development of the Market-wide Adjusted Index Rate" Section.

{2} Federal Reinsurance Program is no longer applicable starting in 2017.

Exhibit H - Non-Benefit Expenses and Profit & Risk

Anthem Health Plans of Kentucky, Inc.
Individual

Rates Effective January 1, 2023

	Expenses Applied As a PMPM Cost	Expenses Applied as a % of Premium ⁽¹⁾	Expenses Expressed as a PMPM ⁽⁵⁾
Administrative Expenses			
Administrative Costs			
Quality Improvement Expense			
Selling Expense			
Specialty Expenses			
Total Administrative Expenses			\$53.59
Taxes and Fees			
PCORI Fee			
ACA Insurer Fee			
Risk Adjustment Fee ⁽²⁾			
Marketplace User Fee			
MLR-Deductible Federal/State Income Taxes ⁽³⁾			
Misc Taxes & Fees - %-of-Premium			
Total Taxes and Fees			\$18.67
Profit and Risk Margin ⁽⁴⁾			\$32.16
Total Non-Benefit Expenses, Profit, and Risk			\$104.43

NOTES:

{1} The sum of the rounded percentages shown may not equal the total at the bottom of the table due to rounding.

{2} The Risk Adjustment User Fee reflects the per capita annual user fee rate established by HHS at the time this filing was prepared: \$2.64 per year or \$0.22 per-enrollee-per-month.

{3} Includes only those income taxes which are deductible from the MLR denominator; in particular, Federal income taxes on investment income are excluded.

{4} Profit and Risk Margin shown here is post-tax profit, net of those federal and state income taxes which are deductible from the MLR denominator.

{5} Anthem's Non-Benefit Expenses are applied in both PMPM and % of Premium as shown above. The last column expresses all non-benefit Expenses in PMPM only.

Exhibit I - Federal MLR Estimated Calculation

Anthem Health Plans of Kentucky, Inc. Individual

Rates Effective January 1, 2023

Numerator:

Incurring Claims ^{1}	Exhibit C (Line 16) + Exhibit F (Total Non-EHBs)
+ Quality Improvement Expense	Exhibit H
+ Risk Corridor Contributions	
+ Risk Adjustment Net Transfer	Exhibit G
+ Reinsurance Receipts	Exhibit G
+ Risk Corridor Receipts	
+ Reduction to Rx Incurred Claims (ACA MLR)	Footnote ^{3}
= Estimated Federal MLR Numerator	

Denominator:

Premiums ^{2}	Incurring Claims + Exhibit G (Total) + Exhibit H (Total)
- Federal and State Taxes	Exhibit H (Federal/State Income Taxes)
- Premium Taxes	Exhibit H (Premium Tax)
- Risk Adjustment User Fee	Exhibit H
- Reinsurance Contributions	Exhibit G
- Licensing and Regulatory Fees	Exhibit H (PCORI, ACA and Marketplace Fees)
= Estimated Federal MLR Denominator	

Estimated Federal MLR

Footnote ^{4}

NOTES:

{1} Incurred Claims = Projected Paid Claims for EHB (Exhibit C Line 16) + additional non EHBs (Exhibit F Total Non-EHBs)

{2} Premiums = Incurred Claims in this exhibit + Risk Mitigation Programs in Exhibit G + Non-Benefit Expenses and Profit & Risk Margin in Exhibit H

{3} This is the amount of 2023 pharmacy claims that are attributable to PBM Administrative Expenses (i.e. the 'retail spread' or 'pharmacy claims margin'). It is calculated by applying the 3rd party margin percentage to the 2023 projected Pharmacy claims including projected rebates.

{4} The above calculation is purely an estimate and not meant to be compared to the minimum MLR benchmark for federal/state MLR rebate purposes:

- * The above calculation represents only the products in this filing. Federal MLR will be calculated at the legal entity and market level.
- * Not all numerator/denominator components are captured above (for example, fraud and prevention program costs, payroll taxes, assessments for state high risk pools etc.).
- * Other adjustments may also be applied within the federal MLR calculation such as 3-year averaging, new business, credibility, deductible and dual option. These are ignored in the above calculation.
- * Licensing and Regulatory Fees include ACA-related fees as allowed under the MLR Final Rule.

Notes:

(1) This adjustment reflects the projected costs of the population eligible for catastrophic plans.

(2) This is an additive adjustment that includes all the selling expense, administration and retention items shown in Exhibit H, with the exception of the Exchange User Fee. The Exchange User Fee has been included in the Market-wide Adjusted Index Rate at the market level.

(3) The Plan Adjusted Index Rate is calculated by multiplying the Market-wide Adjusted Index Rate by the AV and cost sharing, provider network, benefits in addition to the EHBS, and catastrophic plan adjustments and then adding the administrative costs. The Plan Adjusted Index Rate can also be described as a Plan Level Required Premium.

(4) See Exhibit K - Calibration.

(5) The Consumer Adjusted Premium Rate is equal to 'Plan Adjusted Index Rate' divided by 'Calibration Factor'.

Exhibit K - Calibration

Anthem Health Plans of Kentucky, Inc. Individual

Rates Effective January 1, 2023

<i>Average rating factors for 2023 population:</i>	
	Calibration Factors
Age	1.7986
Tobacco	
Area	0.9982
Total Calibration Factor{1}	

NOTES:

{1} Total Calibration factor was used in Exhibit J.

{2} Age calibration includes adjustments for membership that exceeds the three child dependent cap, as permitted by CMS per 2023 Part 3 Instructions.
